Challenges & Resources

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring these questions:

TIP: If you're alone, reflect or journal.

What are some of the challenges in your life these days? (in the world, body, or mind)

What mental resources do – or could – help you with these challenges?

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring this question:

TIP: If you're alone, reflect or journal.

What psychological resources – **inner strengths** – would you like to develop in yourself (perhaps through this program)?

Inner Strengths Are Built From Brain Structure

Mental activity entails
underlying neural activity.

Repeated mental activity
entails repeated neural activity.

Repeated neural activity
builds neural structure.

A network of glowing yellow neurons with a central neuron highlighted in green. The neurons are interconnected by a dense web of thin, yellow, fiber-like structures. The central neuron has a bright green nucleus and is surrounded by a network of yellow fibers. The background is dark, making the glowing neurons stand out.

Neurons that fire together,

wire together.

Learning – changing neural structure and function, proceeds in two stages:

Encoding

Consolidation

Activation

Installation

State

Trait

Inner strengths are grown from experiences of them or related factors – activated states – that are installed as traits.

You become more **compassionate** by repeatedly installing experiences of compassion.

You become more **grateful** by repeatedly installing experiences of gratitude.

You become more **mindful** by repeatedly installing experiences of mindfulness.

Most experiences of inner strengths –
resilience, kindness, insight,
mindfulness, self-worth, love, etc. –
are **enjoyable**.

Without **installation** – without turning passing mental states into enduring neural structure – there is no learning, no change in the brain.

Activation without installation is pleasant, but has no lasting value.

What fraction of your beneficial mental states ever become neural structure?

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring this question:

TIP: If you're alone, reflect or journal.

What are some of the good facts in your life these days?

As the listener, keep finding a genuine gladness about the good facts in the life of our partner.

The Three Ways to Engage the Mind

In the Garden of the Mind

3

**Increase
the positive**

Witness. Pull weeds. Plant flowers.

Let be. Let go. Let in.

Mindfulness is present in all three.

“Being with” is primary – but not enough.

We also need “wise effort.”

Having Beneficial Experiences

How to Take in the Good: HEAL

Activation

1. Have a beneficial experience

Installation

2. Enrich the experience
3. Absorb the experience
4. Link positive and negative material
(Optional)

The Two Ways To Have a Beneficial Experience

1

Notice one you are
already having.

- In the foreground of awareness
- In the background

2

Create one.

How to Create A Beneficial Experience

Look for good facts in:

1. Immediate situation
2. Current or recent events
3. Stable conditions
4. Your character
5. The past
6. The future
7. Bad situations
8. The lives of others
9. Your imagination
10. Care about others
11. Directly evoke a beneficial experience
12. Produce good facts
13. Share about good facts with others

Turning a Good Fact Into a Good Experience

- Bring awareness to your **body**.
- Soften and **open**.
- Be a little **active** in your mind.
- Imagine how **another person** might feel.
- Be kind to yourself, and **encourage** a good experience.

How to Take in the Good: HEAL

Activation

1. **Have** a beneficial experience

Installation

2. **Enrich** the experience
3. **Absorb** the experience
4. **Link** positive and negative material
(Optional)

Reflections So Far

You can notice or create a beneficial experience.

There are lots of ways to create experiences.

Beneficial experiences are usually based on facts.

Recognizing good facts does not deny bad ones.

Good facts about yourself are facts like any other.

Enriching Beneficial Experiences

How to Enrich an Experience

- **Duration** – 5+ seconds; protecting it; keeping it going
- **Intensity** – opening to it in the mind; helping it get big
- **Multimodality** – engaging multiple aspects of experience, especially perception and emotion
- **Novelty** – seeing what is fresh; “don’t know mind”
- **Salience** – seeing why this is personally relevant

Absorbing Beneficial Experiences

Two Aspects of Installation

Enriching

Mind – big, rich, protected experience

Brain – intensifying and maintaining neural activity

Absorbing

Mind – intending and sensing that the experience is received into oneself, with related rewards

Brain – priming, sensitizing, and promoting more effective encoding and consolidation

Absorbing an Experience

- Intend to receive the experience into yourself.
- Sense the experience sinking into you.
 - Imagery – Water into a sponge; golden dust sifting down; a jewel into the treasure chest of the heart
 - Sensation – Warm soothing balm
 - Give over to it; let it change you.
- Be aware of ways the experience is rewarding.

*The good life,
as conceive it,
is a happy life.
I do not mean that
if you are good
you will be happy;
I mean that
if you are happy
you will be good.*

Bertrand Russell

Being for Yourself

- Bring to mind someone you are *for*. Find a sense of caring, support, being loyal, standing with someone as an ally. Know this stance toward someone.
- Apply this stance, this feeling, toward yourself.
- Recognizing your difficulties and burdens. Recognizing injustice applied to you. Recognizing the impacts on you.
- Finding determination that you not be mistreated, that you cope with challenges, that you be truly happy, having a good life as best you can.

It's Good to Take in the Good

- **Development of specific inner strengths**
 - General - resilience, positive mood, feeling loved
 - “Antidote experiences” - Healing old wounds, filling the hole in the heart
- **Implicit benefits:**
 - Shows that there is still good in the world
 - Being active rather than passive
 - Treating yourself kindly, like you matter
 - Rights an unfair imbalance, given the negativity bias
 - Training of attention and executive functions
- **Sensitizes brain to positive: like Velcro for good**

Needs Feel Met: Responsive Mode

When we feel basically **safe** – not disturbed by **threat** – the Avoiding system goes Responsive, with a sense of **peace**.

When we feel basically **satisfied** – not disturbed by **loss** – the Approaching system goes Responsive, with a sense of **contentment**.

When we feel basically **connected** – not disturbed by **rejection** – the Attaching system goes Responsive, with a sense of **love**.

The Responsive Mode is Home Base

In the **Responsive “green zone,”** the body defaults to a sustainable equilibrium of refueling, repairing and recovering.

The mind defaults to a sustainable equilibrium of:

Avoiding

Peace

Approaching

Contentment

Attaching

Love

This is the brain in its homeostatic **Responsive,**
minimal craving mode.

Needs Don't Feel Met: **Reactive Mode**

When we feel **unsafe** –
disturbed by **threat** – the
Avoiding system
goes Reactive,
with a sense
of **fear**.

When we feel **dissatisfied** –
disturbed by **loss** –
the Approaching
system goes
Reactive, with
a sense of
frustration.

When we feel **disconnected** –
disturbed by
rejection – the
Attaching system
goes Reactive,
with a sense
of **heartache**.

The Reactive Mode is Leaving Home

In the **Reactive “red zone,”** the body fires up into the stress response: fight, flight, or freeze; outputs usually exceed inputs; long-term building projects are deferred.

The mind fires up into:

Avoiding

Fear

Approaching

Frustration

Attaching

Heartache

This is the brain in its allostatic **Reactive**, *craving* mode.

Coming Home, Staying Home

Meeting your core needs brings you home to the **Responsive** “green zone.”

Taking in the good Responsive states grows Responsive traits. In a wonderful cycle, these traits promote good states – which can strengthen your Responsive traits.

Responsive states and traits help you stay Responsive when the world is flashing red.

Can You Stay in the Green Zone When:

Things are unpleasant?

Things are pleasant?

Things are heartfelt?

Some Types of Resource Experiences

Avoiding Harms

Feeling basically

Feeling pleased,
glad, grateful, satisfied

Therapeutic,
spiritual, or existential
realizations

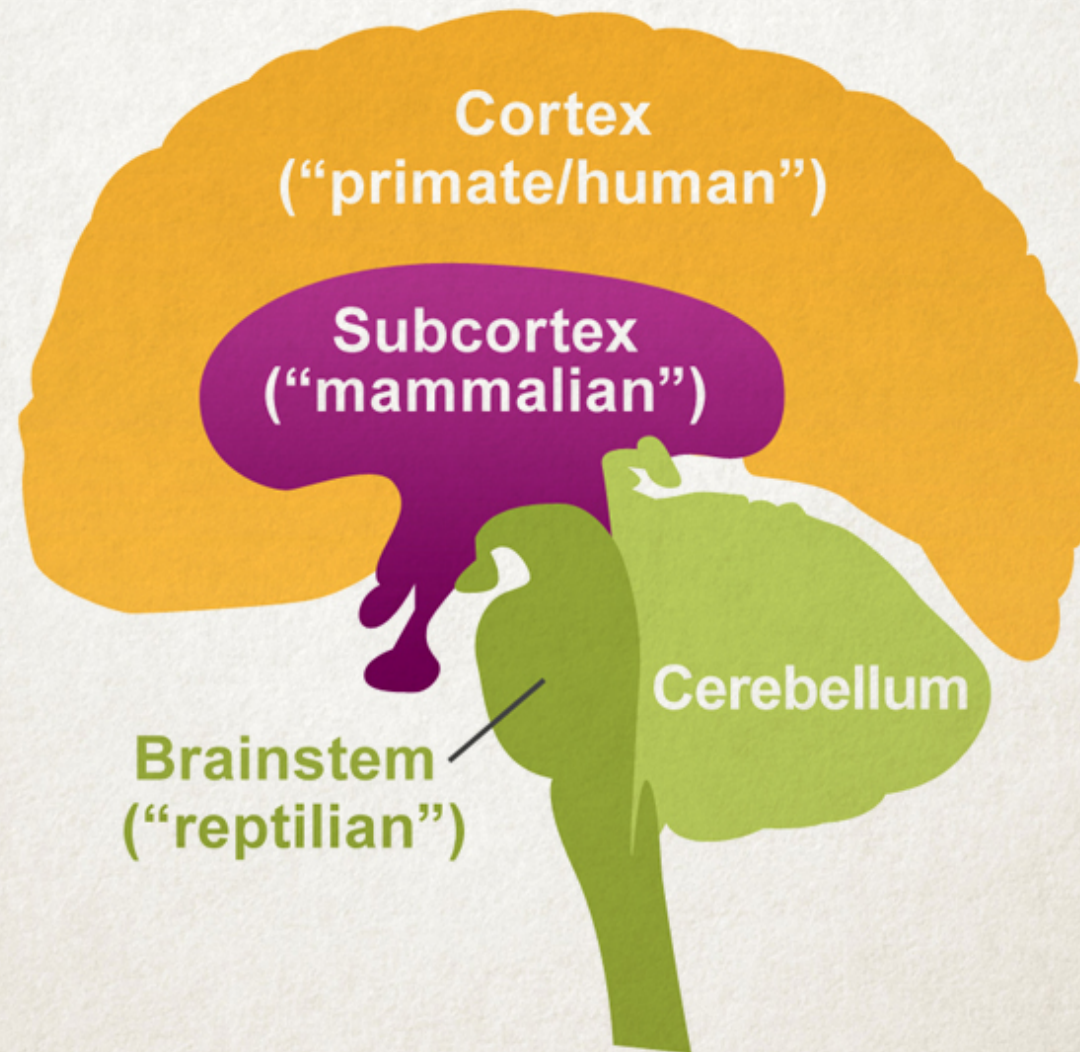

Attaching to Others

Feeling basically
connected

Feeling included, seen,
liked, appreciated,
loving

Feeling
compassionate, kind,
generous, loving

Linking Positive and Negative Experiences

“Negative” Material

- “Negative” material includes pain, worry, discomfort, helplessness, anger, frustration, disappointment, drivenness, addiction, loneliness, insecure attachment, hurt, jealousy, resentment, inadequacy, shame
- Comes from the presence of the “bad” and the absence of the “good”
- Activated explicitly and implicitly

How Linking Works

- Activated negative material associates to whatever is also present in awareness.
- When negative material leaves awareness, these associations are reconsolidated in memory.
- This means that positive material can soothe, ease, put in perspective, and even replace negative material.
- Examples: pain held in spacious awareness; telling a friend about a problem; self-compassion for an upset; feeling cared about alongside feeling hurt

HEAL by Taking in the Good

1. **Have** a beneficial experience.
2. **Enrich** it.
3. **Absorb** it.
4. **Link** it with negative material.
(Optional)

Conditions for the Link Step

- Divided awareness;
holding two things at once
- Not hijacked by negative;
if so, drop negative
- Positive material is more
prominent in awareness.

Degree of Engagement with Negative

- The **idea** of the negative material
- A **felt sense** of the negative material
- The positive material **goes into** the negative material

Throughout, the positive material remains more prominent in awareness.

Skills with the 4th Step

- Be on your own side; you want the positive to win. Perhaps imagine inner allies with you.
- Be resourceful. It's OK to be creative, even playful.
- If the negative gets too strong, drop it; return to positive.
- Get a sense of receiving the positive into the negative.
- End with just the positive.
- Start with positive or negative material.

Multi-Purpose Inner Strengths

Being on your own side

Centering

Love

Feeling cared about | Feeling caring | Self-compassion

Self-Compassion

Compassion is the wish that beings not suffer, with warm-hearted concern. Compassion is sincere even if we can't make things better.

Self-compassion simply applies this to oneself.

To encourage self-compassion:

1

Get the sense of being cared about.

2

Bring to mind beings you care about. Find compassion for them.

3

Shift the compassion to yourself.

“Anthem”

*Ring the bells that can still ring

Reflections on Fear

- Fear is normal. Avoiding harms is fundamental.
- Much anxiety is unnecessary and unreasonable.
- We tend to overestimate threats and underestimate opportunities and resources.
- People can be afraid . . . to give up fear.
- Remember that you can give up unnecessary anxiety and still remain appropriately cautious, watchful, and strong.

Class 4: Strengths for Safety

Feeling protected

Feeling alright right now

Handling threats in a Responsive way

Centering in peace, contentment, and love

Feeling Protected

- Protections in your setting
- Resources inside you and in your life
- Other beings who could help protect you
- Imagining a shield, a force field protecting you
- Feeling as safe as you reasonably can
- Needless anxiety falling away . . . No need to struggle with anything unpleasant inside you or out in the world . . .

Feeling Basically Alright Right Now

- Tuning into the body's signals that all is well right now
- Aware of breathing going fine . . . the heart beating . . . awareness itself keeps on going no matter what arises . . .
- Letting go of the past, not worrying about the future. Noticing that at least in this moment you are OK.
- Being alright, you can let go of any need to struggle with anything unpleasant.
- Feeling alright sinking into places inside that haven't . . .

Sense of accomplishment

Finding beauty

Imagining the rewards of something

Handling opportunities and losses
in a Responsive way

Centering in peace, contentment, and love

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring this question:

TIP: If you're alone, reflect or journal.

What are some of the things you have **accomplished** in your life?

(Including lots of seemingly small things)

Take in your partner's recognition of you.

Explore this setting for things that are beautiful (or otherwise pleasureable) to you: sounds, sights, tastes, touches, smells, and thoughts. Look for little things.

Really **take in** the sense of beauty (or the sense of pleasure in general).

Liking and Wanting

- **Desire** (positively or negatively valenced):
 - Liking: enjoying, preferring, valuing, “nice to have”
 - Wanting: pressure, tunnel vision, insisting, “must have,” addiction, craving; different from simple determination, passion, ambition, aspiration, commitment
 - You can like without wanting and want without liking.
- **Liking without wanting: heaven; wanting without liking: hell.**
- Dealing with the unpleasant, pleasant, heartfelt, and neutral on the basis of liking without tipping into wanting is the essence of the Responsive mode.

Encouraging Motivation

In some ways, the key to life is helping yourself learn to want things that are good for you that you don't yet want.

It is said that wisdom is choosing a greater happiness over a lesser one.

To help your brain want and choose that greater happiness, associate anticipated rewards with whatever you want to encourage, by:

1

Before doing it,
imagine the rewards.

2

While doing it,
focus on the rewards.

3

After doing it,
recall the rewards.

The Tip of the Root

In the fourth step of TG, you could try to get at the youngest, most vulnerable layer of painful material.

The “tip of the root” is commonly in childhood. The brain is generally more affected by the negative experiences that occur in early childhood than by ones occurring later in life.

Prerequisites:

1

Understanding the need to get at younger layers

2

Compassion and support for the inner child

3

Capacity to “presence” young material without flooding

Feeling of Worth

- It is natural and important to feel that you have worth as a person – which does not mean arrogance or ego.
- **You develop this sense of worth through:**
 - Others including, appreciating, liking, and loving you
 - You respecting yourself
- **Take in experiences of being:**
 - Capable, skillful, talented, helpful
 - Included, wanted, sought out, chosen
 - Appreciated, acknowledged, respected
 - Liked, befriended, supported
 - Loved, cherished, special

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring this question:

Healthy Assertiveness

What supports it:

- Being on your own side
- Self-compassion
- Naming the truth to yourself
- Refuges: Three Jewels, reason, love, nature, transcendental, awareness, practice
- Taking care of the big things so you don't grumble about the little ones
- Health and vitality

Healthy Assertiveness: How to Do It -

1

- Know your aims; stay focused on the prize; concede small points to gain on large ones
- Ground in empathy, compassion, and love
- Practice unilateral virtue

Healthy Assertiveness: How to Do It -

2

- Communicate for yourself, not to change others
- Wise Speech; be especially mindful of tone
- NVC: “When X happens, I feel Y because I need Z.”
- Dignity and gravity
- Distinguish empathy building (“Y”) from policy-making

Healthy Assertiveness: How to Do It -

3

- If appropriate, negotiate solutions.
- Establish facts as best you can (“X”)
- Find the deepest wants (“Z”)
- Focus mainly on “from now on”
- Make clear plans, agreements
- Scale relationships to their actual foundations

Pick a partner and choose an A and a B (A's go first). Then take turns, with one person speaking while the partner mainly listens, exploring these questions:

TIP: If you're alone, reflect or journal.

What are the key benefits for you from this training?

What are your key intentions for the days and weeks ahead?

In the Days Ahead

- Make taking in the good an informal daily habit
- At the end of any formal practices – meditation, exercise, journaling, prayer, yoga, walking the dog – take a few moments to take in the benefits
- Know what your current “vitamin C” is – and look for opportunities to feel it and internalize it
- Be mindful of the hedonic tone of experiences – unpleasant, pleasant, heartfelt, neutral – and help yourself tip toward the green zone about them
